

## Other Issues 2013

33) Describe how well the CME has operated.

We have a committed core membership regularly at meetings and carrying out the work of the CME in accord with our Goals, Objectives, and Strategies. We have cross-over membership with other local organizations such as Save the Loop, Audubon, Ormond MainStreet, Citizens for Ormond Beach, the Florida Native Plant Society. Since designation we have maintained successful working relationships with local governmental bodies. We monitor the activities of our neighboring byways, the Florida Black Bear Scenic Byway and the A1A Scenic and Historic Coastal Byway. Our community outreach and education efforts have been highly successful given the size of our CME.

34) Describe how partnering and coordination efforts have worked.

Our partnering relationships have continued to be both productive and highly enjoyable. The Ormond Beach Public Library offers meeting space for the CME. Staff from Tomoka State Park and North Peninsula State Park have offered active support for ongoing projects such as an observation platform along the Red Trail. Tomoka State Park has hired a volunteer coordinator. The CME is working closely with the volunteer coordinator on Tomoka State Park events and programs open to the public.

35) Provide discussion of any other issues the CME feels are relevant to the corridor's success.

The CME appreciates the collaboration of FDOT and consultants in encouraging the success of our CME.
